

EASYMFG

M400Pro

Metal Binder Jetting 3D Printer

**Unlock the Power of Rapid,
Small-Scale Production**

Designed for the fast and efficient production of small-scale, production-grade parts, the EASYMFG M400 Pro Metal Binder Jetting 3D Printer is your gateway to precision, speed, and reliability. Catering to the needs of medium-sized products, it brings innovation to your fingertips.

Model	M400 Pro
Build Volume (mm)	L400* W250* H200
Outer dimension(mm)	L1756*W809*H1504.5
Part Accuracy	±0.05 mm
Print Speed	10-15 S/layer
Layer Thickness (mm)	0.03-0.1 adjustable
Powder Delivery	Sieve, compaction, compatible with various powder morphologies
Printing Mode	One-pass printing, high efficiency
Build Chamber Fixation	Replaceable build chamber
Number of Printheads	Piezoelectric printhead, width equals build chamber width
Resolution	Printhead NPI: 600; Print Resolution: 1200
Software Support	STL, 3MF
Power Requirement	Single-phase, 220V, 10A, 50HZ
Materials	Titanium alloy, iron-based powder, copper powder, stainless steel powder, etc.
